

ICFA-HB2002,  
H<sup>-</sup> Stripping Session,  
April 11, 2002

## **Motivation of this session**

**We are now in uneasy situation with stripping media!**

**Solid foils do not seem enough durable against MW proton beam.**

**Although laser stripping seems promising, but we have not yet found out a realistic way of laser stripping.**

**Motivation of this session is**

**to find out a break through to this situation**

**or at least any hint leading to it**

**by exchanging and discussing recent results of study in the world.**
